it is vain, but all I can do

C D Em (2x)

And the ices they have gone,

C D Em (2x) D (2x) C (2x) D (4x)

The ices they have gone.

I saw the houses downed,

in the melting of the ground.

The wind it laughed wild and shrill,

My heart it tried to spill

Its crazy tears.

For all the things we didn't do

For the ices, they have gone,

The ices, they have gone.

I stand both young and old

But the winds of time blow cold.

This much you must believe:

It pains to see you grieve.

I pity you,

For the things that we didn't do

For the ices, they have gone,

The ices, they have gone.

As a pilgrim I did go

To a land that I did know,

To the shores of Iqaluit,

To see the warming hit

The North.

The warming running its course,

And the ices, they have gone,

The ices, they have gone.

Blowing in the wind

**How many roads must a man walk down
Before they call him a man
How many degrees must the temperature rise
Before he will understand
How much carbon can the chimneys emit

**How many years will the glaciers exist
Before they are washed to the sea
How many years can some people exist

**How many times must a man look up
Before he can see the sky
How many ears must one man have
Before he can hear people cry
How many droughts will it take till he knows

Castle of Doubt

Is there no way out of here ?
Asked the king with fright
There are enemies all over
I don't know what's wrong or right

Droughts and floods and fires
The queen was on her knees
We are wasting this kingdom
This warming has to cease

No reason to get excited
The sceptic slyly spoke
It's just a full-scale experiment
So we'll see if it's a joke

Evolution or creation
be that as it may
but the life on earth is sacred
exclaimed a man in grey

We have all the solutions
did the advisor sadly state
but no one pays their contribution
and soon it is too late

Outside in the darkness
the rain began to pound
a child was seeking refuge
and the ground was drowned

Far between sundown's finish an' midnight's broken toll
We ducked inside the doorway, as thunder went crashing
As majestic bells of bolts struck shadows in the sounds
Seeming to be the bells of climate flashing
Flashing for the forests, that fires turn to ash
For all the homes and houses, the gusts of hurricanes thrash
and all the mighty ices, that into oceans crash
An' we gazed upon the chimes of climate flashing

D G A D

Through the city's melted furnace, unexpectedly we watched
With faces hidden as the walls were tightening
As the echo of the wedding bells before the blowin' rain
Dissolved into the bells of the lightning
Tolling for farmers, whose soil is turned to dust
For the ecosystems crashing, when balance's being bust
Tolling for the species, not able to adjust, An' we gazed upon the chimes of climate flashing

Chimes of Climate

Through the mad mystic hammering of the wild ripping hail
The sky cracked its portent, the clouds asunder
That the clinging of the church bells blew far into the breeze
Leaving only bells of lightning and its thunder
Striking for the scientists, whose warnings are unheard
Striking for the engineers, whose solutions are deterred
and for the climate sceptics, whose reasoning is absurd, An' we listened to the bells of climate striking

In the wild cathedral evening the rain unraveled tales
For the disrobed faceless forms of no position
Tolling for the tongues with no place to bring their thoughts
All down in taken-for-granted situations
Striking for the nations, where land is lost to sea
Striking for the refugees, with nowhere left to flee
and each and every searching soul, without a place to be,
An' we listened to the bells of climate striking

Even though a cloud's white curtain in a far-off corner flared
An' the hypnotic splattered mist was slowly lifting
Electric light still struck like arrows, fired but for the ones
Condemned to drift or else be kept from drifting
Tolling for the young and bold, not knowing what goes on
For our children's children's children, not yet knowing we did wrong
for the billions babies of posterity, to which this earth belongs,
An' we listened to the bells of climate tolling

Paralyzed an' dumbstruck as I recall when we were caught
Trapped by no track of hours for they hung suspended
As we listened one last time an' we watched with one last look
Tearstained an' swallowed 'til the tolling ended
Striking for the gentle, striking for the kind
Striking for the guardians and protectors of our time
An' the heroes of the climate, who never will resign,
An' we listened to the bells of climate tolling

Climate hero

I dream of them drowning, I'm hearing them cry

Children in panic, they don't want to die

The water is shallow, but to them it is high

If you want to be a hero, you'll have to get wet

If you want to be a hero, you'll get your feet wet

Grown-ups are watching, close by the sea

Somebody help them ! Go out and see !

But nobody's thinking that somebody's me

If you want to be a hero, you'll have to get wet

If you want to be a hero, you'll get your feet wet

The temperatures rising, degree by degree

We're free to waste the future to be

But a freedom like that, is prison to me

% A climate hero is something to be %

It's twenty years now, they tried to agree

The reason for failure is easy to see

Nobody wants the costs that will be

% A climate hero is something to be %

Everyone knows it's a matter of price

As long as it's zero, emissions will rise

It's not all that hard, but nobody tries

% A climate hero is something to be %

The Climate is A-Changin'

Come gather 'round people
wherever you roam
and admit that the waters
around you have grown
and accept it that soon
you'll be drenched to the bone
If your time to you is worth savin'
then you better start swimmin' or you'll sink like a stone
for the climate is a-changin'

Come writers and critics
make use of your pen
and keep your eyes wide
the chance won't come again
and don't wait to speak
for the wheel's still in spin
and there's no tellin' whether we will be failing
But all too soon it's too late to begin
for the climate is a-changin'

Come senators, congressmen
please heed the call
Don't stand in the doorway
don't block up the hall
The idle and guilty
will tumble and fall
There's a storm outside and it is raging
It'll soon shake your windows and rattle your walls
for the climate is a-changin'

Come climate sceptics
throughout the land
and don't criticize
what you can't understand
The runaway climate
is beyond our command
Your old road is rapidly agin'
Please get out of the new one if you can't lend your hand
for the climate is a-changin'

we've seen enough of your empty pointless show

you came with wealth and glamour, but that was long ago

and now your tatty times are through

CO₂ society, it's time for you to leave

to spare our children's children's children from what else would be

cause you're wasting their future, degree by degree

we don't need your climate catastrophe

We need an end to CO₂ release, we deserve the climate actions that's for real

so we can see straight in our children's eyes, proud and free of shame

Damage done

I saw the kilns for making cement

I saw the blast furnaces where coal is spent

Oh, oh, is this development?

I saw the power plant with chimneys high

I saw the smoke against the morning sky

Why, why, tell me why?

I saw the cars waiting to be filled

I saw the green meadows in the hills

Who'll stop the climate change, who will?

I sing the song because I love the land

there's some of you who don't understand

Oh, oh, it's getting out of hand

I see our future and the damage done

a little part of it in everyone

Oh, oh, it's just begun

But there are other ways of doing things

It's up to us what tomorrow brings

Oh, oh, the damage done

But when I think that we could do right

tears of rage do blind my sight

Oh, oh, the damage done

The Day of Grace

A day will come, when everything's undone
and man will rise in pride and glory
there'll be dancing in the street, to celebrate this feat
on the day when the dragon's down

And a rain will fall, unto the thirsty ground
and the fires of the forests will be fading
and ices cease to melt, and everyone can tell
a new world is a-waking

And the sun will rise in grace, and bring joy to every face
and the colours of the corals will be sparkling
and the species that are saved, will rejoice in dens and caves
the day when the warming stops

And the former climate foes, will be staring at their toes
and the birds and the bees will be laughing
and a meter on the wall, shows how CO₂ does fall
and the whole wide world is watching

Listen to the wind softly singing
words of a world that has agreed
and the bells of hope start their ringing
and we celebrate the future to be

EVE OF DESTRUCTION (Barry McGuire)

D G A7 D G A
The climate's running wild, glaciers weep and die. Storms, floods, droughts, and fires, multiply

D G A
The way we waste this world, makes you wanna cry

D G A
Will this century be, infamous for our terracide?

D G A
When our shame is exploding, there'll be nowhere to hide

D G A D Bm
But you tell me, over and over and over again my friend,
G A D G A
Ah, you don't believe we're on the Eve of Destruction.

D G A D G A
Don't you understand what I'm trying to say? Can't you feel the fear that I'm feeling today?

D G A
When weather extremes, will come each and every day,

D G A
When climate's breaking down, there's no running away.

D G A
Instead of trying to save, we put the world in a grave,
D G A D Bm
But you tell me, over and over and over again my friend,
G A D G A
Ah, you don't believe we're on the Eve of Destruction.

D G A7 D G A
My blood's so mad feels like coagulating, I'm sitting here in desolation

D G A D G A
You can't twist the truth there are no regulations, emissions just rise for the lack of legislation.

D G A D G A
Talk alone, doesn't stop the devastation, when our self- respect is disintegrating.

D G A
This whole crazy world is just too frustrating.

D G A D Bm
But you tell me, over and over and over again my friend,
G A D G A
Ah, you don't believe we're on the Eve of Destruction.

D G A7 D G A
Ocean levels are on the rise. We're rapidly losing, the Arctic Ice;

D G A D G A
Forests are burning, and farmland dries, while climate deniers, are TRUMPeting their lies

D G A D G A
Are we blind and deaf, when our conscience cries? And too dumb and daft, to get a carbon price?

D G A
How can we look our children in the eyes?

D G A D Bm
But you tell me, over and over and over again my friend,
G A D G A
Ah, you don't believe we're on the Eve of Destruction.
G A D G A
Ah, you don't believe we're on the Eve of Destruction.

Everybody knows it's warming fast
Everybody knows the how and why
Everybody knows why the wind will blast
Everybody knows why the deserts dry
And in the dark and lonely night
Everybody knows we could make it right,
yet wrong it goes, and everybody knows

Everybody knows what it is we're wasting
Everybody knows we can do as we please
Everybody knows there should be a price
For every single tonne we release
Everybody knows we can waste it for free
Everybody knows the future to be
And so it goes, yet everybody knows

The climate agreement, is no more than a start
with no incentives or duties
As long as carbon emissions are for free
no real reductions will be

But we're facing forwards, *forwards* for to find a better *future*
for the billions to be born
Forget the past, *forget* what's lost, we'll find the doors to open up
and greet the grace of dawn

D* consists of D, followed by 'D1', 'D2' and D again

I got every reason on earth to be mad % D G6 %
We're wasting the only earth we ever had % D G6 % A
If I could stop CO₂, G
I'd show you what a little girl can do
But I can't, and I just wanna cry D A D

Droughts and floods, and climate breakdown
Ices melt and island-nations drown
We need to stop this shame
and have our leaders use their brains
'til then, I'll strike from school

 I wanna cry out my despair F#m
 But crying gets nowhere E
 So Friday's I'm on climate strike A
 to gather friends to get this right H7 E7 A7

And when they come you better hide the coal far down
where it belongs, way down below the ground
Yes we will stop CO₂
and show you what the little girls can do
And then we'll cry no more

 We're gonna bend the chimneys down
 right into the ground
 and protect the atmosphere
 from the greenhouse gas you put up there

And when we come you better hide the gas and oil
Where it belongs far down below the soil
Yes we will stop CO₂
and show you what the little girls can do
And then we'll strike no more

God Save the Earth

God save our gracious Earth
Long live our planet Earth
God save the Earth
Save her from our greed
Save her from greenhouse heat
Save her for our children's needs
God save the Earth

Let us hand down this Earth
Safe to our children
God save the Earth
Save her from our mistakes
Save her from our climate rape
Help us do what it takes
to save the Earth

God help us make the rules
to guard us from fossil fuels
God save the Earth
Save her from rising seas
Save all her species
Help us do our duties
to save the Earth

Words in the talks

In reports and declamations, investigations

Words in the wind

Blow around the institutions, all in confusion

 But will they ever lead to action

 Where is a sign of a turn

 from the dire slope we go down

Goodbye reason and sense

Grand are the plans

to be executed later on, when decades have gone

Tough are the goals,

for future leaders, we just leave it with them

to fulfill our plan

 so we can sit back in inaction

 watching the temperatures rise

 is this the the way we honour our lives?

Goodbye reason and sense ...

Greta Thunberg' speech

Lyrics from Greta's speech in the UK parliament, April 2019

My name is Greta Thunberg. I am 16 years old...	G F
and I speak on behalf of future generations....	Am G
you don't want to listen, you say we are just children.	G F
But we only repeat the message of the climate science.	Am G
I assure you we will go back to school	C
when you listen to the science	Em
and give us a future. Is that really too much to ask?	F C
In the year 2030 I will be 26	C Em
a great age, we have been told.-But I am not so sure	F G

I was told us to dream big; I could become what I wanted to.
We had everything we could wish for
and yet now, we may have nothing.
Now we probably don't even have a future any more.
Because that future was sold ... It was stolen from us
You lied to us. You gave us false hope.
You told us that the future was something to look forward to.
And the saddest thing ... most children are not even aware
of the fate that awaits us. until it's too late.

And yet we are the lucky ones. Those affected the hardest
are already suffering. But their voices are not heard.
Around 10 years from now, we will set off an irreversible
chain reaction beyond human control,
that will most likely end our civilization as we know it.
unless we do permanent and unprecedented changes
including a reduction of carbon dioxide emissions by
at least 50% by the year 2030.

the last months I have travelled ... repeating these words...
But nothing has changed... the emissions are still rising.
the basic problem is that nothing is done to
halt climate breakdown, despite all words and promises.
the most dangerous misconception is we have to "lower" our
emissions. that is far from enough. Our emissions have to stop
And by "stop" I mean net zero - and then quickly negative
That rules out today's politics... of continuing, business as usual.

It's a hard rain's a-gonna fall

Oh, where have you been, my blue-eyed son?

Oh, where have you been, my darling young one?

I've stumbled on the side of twelve melting ices

I've walked and I've crawled on eight arid acres

I've stepped in the middle of seven sad forests,

I've walked in the mud of the flood in the valley

I've been breathing the dust of the dry desert farmland

And it's a hard, and it's a hard, it's a hard, and it's a
hard, And it's a hard rain's a-gonna fall.

Oh, what did you see, my blue-eyed son?

Oh, what did you see, my darling young one?

I've seen coral reefs that were losing their colours

I've seen the homes of the children all flooded with water

I've seen the barren trees of an orchard all wasted

I've seen the future of man in the hands of big children

And it's a hard,

And what did you hear, my blue-eyed son?

And what did you hear, my darling young one?

I heard the sound of a thunder, it roared out a warning

Heard songs of birds that will cease to be singing

Heard the roar of an ice that could drown a whole nation

Heard a man denying that something is happening

Heard scientists speaking, and nobody listening

Heard one skeptic laugh, I heard many people crying

And it's a hard,

Oh, what'll you do now, my blue-eyed son?

Oh, what'll you do now, my darling young one?

I'm a-goin' back out 'fore the rain starts a-falling

I'll walk to the depths of the dry dusty deserts,

Where the people are many and their hands are all empty,

Where the sky is empty, and the sun has no mercy

Where the faces of the guilty are always well hidden,

Where hunger is ugly, where souls are forgotten,

Where black is the color, where none is the number,

And I'll tell it and think it and speak it and breathe it,

And reflect it from the mountain so all souls can see it,

Then I'll stand on the ocean until I start sinking

But I'll know my song well before I start singing

And it's a hard, -----

it's coming to the mountains, to the rivers and the plains F# Bm
to the deserts and the blooming fields, it slowly comes with change F# Bm
It's just a market failure, blowing in A G D

It's coming with a change in the mean
in the likeliness of weather extremes
It's coming with the droughts, with fires and with flames
with floods, but noone takes the blame
It's coming with catastrophes, more likely to occur
like they never really happened, because the reason is not sure
It's just a market failure, coming down

It's coming with the facts and the unknown
with all we need to do, that we won't
It's coming with denials, with delusions and with lies
with closing ears and shutting of the eyes
and noone knows what's going on, it's too complex and vast
imagination's not enough, to see what comes at last
It's just a market failure, corrupting our minds

Stand up, stand up, stand up against the greed A G D
for our children, for life to come, for a world in need A G D
Stand up, stand up, stand up, stand up. Em A G D

It's coming to the poor at first
It's coming with hunger and thirst
It takes away our pride, it takes away our hope
as if there's really nothing we can do
we're addicts shooting oil and gas, we're high on fossil dope
and everybody just goes on, as if it wasn't true
It's just a market failure, to be removed

It comes from our efforts to improve
To build an economy that grows
But the market is at loose, devouring oil and coal
like a monster machine beyond control
We need a price on carbon, to set the market right
They say it is impossible, but that's the biggest lie
It's just a market failure, to be undone

But it will meet the ones who are not swayed
and it will meet the ones who finds a way
It will meet with defiance, with persistence and with strength
It will meet with reason at length
It will meet with our mercy with the weak and the poor
It will meet with our duty, to the billions to be born
It's just a market failure, to overcome

Stand up, stand up, stand up against the greed
for our children, for life to come, for a world in need
Stand up, stand up, stand up, stand up.

Let every straw and seed, let all that fields can give
Let all the fish and fowl, let all that makes us live
Let every little bird and bee, hear my solemn praise
Let all the life on land and sea be shielded by our grace

A hundred years ago this world was ruled by wilful kings
now freedom and peace is what democracy does bring
The world has wavered weary under world war one and two
and then through a cold war we shivered scared anew

But now we have a different threat, a warming war to wage
we can no more deny, we're in the greenhouse age
This time we have to face a more elusive enemy
whose appearance is the impotence of our society

This war is fought against all those who doesn't want to see
who are opposing all we need to do and all that needs to be
The heroes of our time do not lie slain on battle ground
They fight by finding facts and then spreading them around/

Mark Lynas has got a gruesome story to tell
Degree by degree unveiling our descent to hell
although it may seem hopeless, a struggle with no cease
remember the fight for democracy and peace

Stop the warming (+capo 3)

 This ball's on fire Gm Bb
 The walls are coming down F C
 In the ashes of the world we knew F C Bb F
 the truth is but a clown Bb C D

If our brains did serve us well
would we need to ask ourselves,
which catastrophes are natural
and when to ring the warming bell?

When the cards are called in the climate game
and likeliness ducks the blame
which of the homes and lives that are lost
are entered as a climate cost?

 This ball's on fire
 Firemen going down
 In the web of slick deniers
 the truth is but a clown

If our brains came to suffice
we would start to mobilize
as if it were, a world war three
to end this idiocy

We would break free from the legacy
of shame and guilt and greed
To guard the world for the ones to come
our brains will need to run

 This ball's on fire
 I hear a young girl's voice
 Among liars and deniers
 the truth is still a choice

This land is your land

This land is your land, this land is my land
From California, with the fires flaring
To the hurricanes of the Gulf Stream waters
This land was made for you and me

As I was walking a ribbon of highway
I saw above me an endless skyway
I saw below me a golden valley
This land was made for you and me

This earth is your earth, this earth is my earth
From bleaching corals, in Australia
To the melting ices, of the Himalayas
This earth was made for you and me

I've roamed and rambled and I've followed my footsteps
To the sparkling sands of her diamond deserts
The bells were ringing, a voice was sounding
This earth was made for you and me

This earth is your earth, this earth is my earth
From retreating ice sheets, in the Arctic
to floods in India, to droughts in Africa
This earth belongs to you and me

The sun comes shining as I was strolling
The wheat fields waving and the dust clouds rolling
The fog was lifting a voice come chanting
This earth was made for you and me

This air is your air, this air is my air
to fill with gases, that corrupt the climate
that waste this precious, gracious planet
This air belongs to you and me

In the squares of the city - I see the school girls
They say their future, has been stolen
and that this planet, is not ours
That it belongs to the one's to come

That the earth belongs to, all the living
It belongs to, our children's children
and to their daughters, and to their sons
and to all the billions, yet to come

This land is your land (shorter version)

This land is your land, this earth is our earth
From California, with the fires flaring
To the melting ices, of the Himalayas

because no-one is prepared to do what we need to do E_{sus}4 E7

We need to act, we need to care
and make an end to releasing greenhouse gases in the air
cause we owe it to the ones we love, to the grace that makes us live
to laughter and music, to all that life can give

Cause our future, is worth the fight
our destiny's not given and we can make it right
and we owe it to our brains, that we were given to use
and we owe it to our self-respect, to our freedom to choose

It's not really hard, to make it stop
With a price on CO₂ the emissions will drop
where are the leaders we need, responsible and strong
who have the courage and stamina, who dare to right the wrong

It can be done, it cannot wait
we need to end this global warming before it is too late
cause we owe it to this planet, to the life it's giving birth
cause we owe it to the billions, to be born upon this earth

We Were Given

We were given the grace, to see with our eyes
a world full of beauty, the wonder of life

We were given the flowers, the birds and the bees
the fields and the forests, the leaves on the trees

Stop the warming, stop the warming, o-oh stop the warming

We were given the earth, the crops and the seed
We were given the farmlands, that yield what we need

We were given the living, in oceans, on land
The future of earth, it's all in our hands

Save our planet, save our planet, o-oh save our planet,

We were given the choice, to care for or waste
to save or destroy. The world's at our grace

Why don't we take action, Why don't we start
to tax the emissions, it's not all that hard

Price the carbon, price the carbon, o-oh price the carbon
Price the carbon, price the carbon, o-oh price the carbon

while mighty glaciers weep

I look at you now, see your oceans a-rising
while nations 'r' lost in the deep

I don't now why, nobody told you
they stole and fooled you
I don't know how, someone controlled you
they bought and sold you

I look at you earth, and I notice you're turning
while drying rain forests sigh
It's just a mistake, but too late to be learning
while bleaching coral reefs die

I don't now how, you were diverted
you were perverted too
I don't know how, you were exerted
no-one alerted you

I look at you now, see the love there that's sleeping
while roaring hurricanes cry
I look at your life, that we fail to be keeping
while fertile farmlands turn dry

Who changed the climate

Not me, said the executive
of the power (plant) company
We have followed all the regulations
The competition was tough
and we're no charity
There should have been taxes and
legislations

Oh no, it wasn't me
said the president
both my hands were tied, and you know it
No I don't feel that good
when I realize what it meant
But with no support, I just couldn't do it

You say I let you down
you know it's not like that
I had to fight for my place and position
You say I'm responsible
but that's not where it's at
Without the votes, I'd been in opposition

Not me, the voter said
who elected the government
You know I was only one of many voices
I'm not the one who's bad
I'm really innocent
Can't you see, there were really no better
choices

You got a lot of nerve
to say I am to blame
Don't you know, I just couldn't help it
I tried to live my life
with no regrets or shame
Don't you see, someone should have
stopped it

The climate sceptic said
I just wanted a fair debate
When I was wrong, why just didn't you
show it
If I'd been silent
we would still have been too late
It wouldn't have changed a thing, and you
know it

Do you tell me we're helpless
and cannot make things shift
Tell me who's supposed to make things
happen
Do you say we're on a ship
helplessly adrift
With neither steering wheel, nor crew nor
captain

B Bmaj7 B7

Verse 3

Will come a day, will come a time
to sail the ship to shore
Relieve the burden,
be free of shame
to cry in tears of joy
How many moons, how many Junes
will pass 'til we make land
and raise our arms and calm the storm
the future in our hands

Verse 2:

Heading for times, unknown to man
so blind with open eyes
We pass the lines,
a path so dark
as concentrations rise
Beneath the numbers, below the graphs
the many that are hit
The storms, the droughts, the floods, the fires
and no one to convict

Winds of Change

Over the rivers, over the mountains, over the oceans wide
Over the forests, beyond the horizon, over the rising tide
Blow the winds, of our loss
From out of the chimneys, out of the tail pipes, invisible, odourless
in the air
A hundred million billion pints of gas
every year
Heating this world of ours,
temperature's rising, temperature's rising, temperature's rising, ooh

See the signs in the sky, in the fields and the forests, in ices, in fires wild
Listen to reason, listen to science, the pleas in the eyes of a child
Hear the winds, of our loss
Coming out of our folly, out of our blindness, out of our ignorance
in the air
A hundred million billion pints of gas
every year
Heating this world of ours,
tipping the balance, tipping the balance, tipping the balance, oh

But under the surface, beyond the betrayals, there is a mounting force
gaining momentum, turning the tables, set to reverse the course
Hear the song, in the wind
From thousands and thousands, asking for action, not ready to waste this earth
From the conscious and caring, seeing a future, set out to break this curse
temperature's rising, put a price on the carbon, price out the carbon now
